**FORM N°X067**

**Version : 1**

**Directive 2014/68/EU**

Adopted by WGP : 08/01/2016

Adopted by CLAP : 08/01/2016

Directive References: Article 4 § 1 (a)

Article 13 § 2

**Subject:** Classification – Vessels containing two phases, one liquid and one gaseous

**Question:** If a vessel contains a fluid which meets the conditions of the introductory paragraph to Article 4 § 1 (a) (i) (e.g. air) and a liquid which meets the conditions of the introductory paragraph to Article 4 § 1 (a) (ii) (e.g. water) - how shall the vessel be classified?

**Answer:** Article 13, paragraph 2 states the classification shall be on the basis of the fluid which requires the higher category. The total volume (V) of the vessel, as defined in Article 2 (10), shall be used to determine the conformity assessment category, not the actual volume occupied by the individual fluids at any particular time.
