**FORM N°X101**

**Version : 1**

**Directive 2014/68/EU**

**Adopted by WGP :** 15/03/2016

**Adopted by CLAP :** 15/03/2016

**Directive References:** Article 14 § 6

**Subject:** Assemblies - Modification

**Question:**

If, during functional testing of an assembly at the user's premises by the manufacturer before placing it on the market, modification of an item of pressure equipment is necessary, shall this modification be carried out in accordance with Directive 2014/68/EU?

**Answer:**

Yes

It is necessary to assess any modification within the global conformity assessment of the assembly even if the declaration of conformity for the item was already issued. This implies checking the technical documentation of this item by the manufacturer and the notified body to verify whether the original design is impacted.

Note: See Guideline A-03 (CLAP X010) and Guideline A-04 (CLAP X011) for modification of pressure equipment in use.
