Version : 1

Directive 2014/68/EU

Adopted by WGP : 15/03/2016

Adopted by CLAP : 15/03/2016

Directive References: Annex I

Annex III

Subject: Conformity assessment - Components

Question: Is a manufacturer of component required to include a design examination, proof test and final inspection by a Notified Body if the component is intended for later use in PED equipment?

Answer: No. Components are not items of pressure equipment, and therefore are not subject to individual conformity assessment procedures.

For requirements on components to be used in pressure equipment, see Guideline A-22 (CLAP X027) and Guideline G-19 (CLAP X155).

NOTE 1: The final inspection including the proof test applies to the complete item of pressure equipment and not to the component itself.

NOTE 2: If the component is not designed according to a harmonised standard, design information may also be requested by the equipment manufacturer.

NOTE 3: There is no legal basis in PED for a Notified Body to issue a certificate of conformity for components.
