

Directive 2014/68/EU

Adopted by CLAP : 26/11/2020

Directive References:

**Subject:** Classification – Atmospheric heaters

**Question:** What type of pressure equipment do high-pressure vaporizers, also called atmospheric heaters, belong to?

**Answer:** They are vessels. See CLAP X062 - PED Guideline B-04.

Note: This type of equipment is intended for heating low temperature liquefied gases such as oxygen, hydrogen, nitrogen and other gases, and not for cooling or heating ambient air.
