CLAP

FORM N°144

Version : 4

Directive 97/23/EC

Keywords : Experimental design method

Design

Directive references: Annex I § 2.1 - 97/23 EC

Annex I § 2.2.4 - 97/23 EC

Adopted by WPG: 28/01/2003

Adopted by CLAP: 28/01/2003

Subject: ESR on design – Experimental design method

Question: Is it possible that the sample to be tested for the experimental design method be produced without its thicknesses reduced by the corrosion allowance?

Answer: Yes, but the corrosion allowance as well as other characteristics are to be used as corrective factors to determine the minimum value for the test pressure, as stated in 2.2.4 a) second paragraph.

Modifications compared to the previous adopted version: Editorial correction on 2004-09-16.
