

**Directive 97/23/CE****Keywords:**

Pressure accessory

Piping

Header

**Directive reference:**

Article 1 § 2.1.4 - 97/23 EC

Annex II - 97/23 EC

**Adopted by CLAP:****27/03/2003****Subject:**

Classification – Pressure accessories intended to be installed on a piping

**Question:**

How to classify a pressure accessory such as a steam header/a manifold/a separator, intended to be installed on a piping?

**Answer:**

They are classified according to the tables applicable to piping while taking into account for the DN, the main part of the accessory, and not the diameter of connection with piping.

Modifications compared to the previous adopted version: modification according CLAP 294.
