Subject: Conformity assessment – Pressure cookers – CE marking

Question: What is the marking information to be put on the constituent parts of pressure equipment intended for domestic use?

Answer: Only the complete pressure equipment can be conformity assessed, and only one CE marking shall be affixed, preferably on the constituent part that is not supposed to be replaced.

The constituent parts of such pressure equipment, which can be sold separately, as spare parts for instance, should have a marking allowing them to be identified unambiguously. They shall not carry a CE marking additional to the marking of the complete equipment.

The declaration of conformity and instructions for use shall describe in an appropriate manner the components making up this equipment. Operating instructions for use shall give the list of spare parts (where appropriate), how to identify them, in particular their marking information.

Note 1: An example would be a pressure cooker constituting a body and lid.
